THE GROWTH OF
THE WARREN DISTRICT.

We know of no other section of the country where there has been reported such a phenomenal growth in the mineral industry during the last four years as in the Warren district. Few people, even in Bisbee, can realize what the growth of this wonderful mining district has been.

It has only been a little more than four years since the Calumet & Arizona Mining Company began its operations in the district; since then all the requirements of the companies included in the Bonanza Circle has been taken over. According to a recent estimate made by those in a position to know the value of the Bonanza Circle property today, including the Calumet & Arizona, based on the selling prices of the various stocks, is more than sixty million dollars. Here is an enormous property which has been developed in the Warren district during the last four years.

This is not the only visible evidence of the growth of the Warren district during the time mentioned. The Copper Queen mine owners have during that time built nearly three hundred miles of railroad and purchased more than five hundred miles of railroad already built on which to bring freight to Bisbee and Douglas, both depending almost entirely on the Warren mining district for support and to haul away the copper output of the great smelting plants in the latter place. The Phelps-Dodge people have purchased great coal mines in New Mexico to furnish the furnace blasts necessary to reduce the copper ores of the Warren districts and other copper districts in this section and in Sonora.

Both the Calumet & Arizona and Copper Queen companies are now engaged in building enlargements to their smelting plants in Douglas which will almost double the present capacity of both and these enormous smelting capacities are to be supplied almost wholly from the mines around Bisbee.

When the enlargements of the Douglas smelter plants are completed it will mean an additional force in the Warren district mines equal to at least one-third the number now at work in the stopes and at the hoists. This means an added population to Bisbee that guarantees that within the next six months the population of this city, including Lowell and the new town of Warren will exceed fifteen thousand souls; four years ago the population did not exceed four thousand; it is now estimated at twelve thousand.

Douglas sprung into existence during the time now under consideration. Douglas was brought into existence as a result of the enormous copper output of the Warren mining district; it is now less than five years old and has a population of eight thousand. Had there been room and a sufficient water supply to maintain the smelters of the Calumet & Arizona and the Copper Queen in Bisbee it can be seen that Bisbee would today have a population of not less than twenty thousand.

No census will probably be taken of the district before the national census taken in 1910. By that time it is safe to predict that within the

KEEP YOUR HEAD UNCOVERED

The Constant Wearing of a Hat Propagates Dandruff Germs.

There are many men who wear their hats practically all the time when awake, and are blessed with a heavy shock of hair; yet if the scalp of these same men once became infested with dandruff germs, the parasites would multiply all the quicker for lack of air. Baldness would ensue as the final result. Newbro's Herpicide kills these germs and stimulates unhealthy hair to abundant growth. Herpicide is a pleasant hair dressing as well as a dandruff cure and contains not an atom of injurious substance. Sold by leading druggists. Send 10c in stamps for sample to The Herpicide Co., Detroit, Mich.

Warren district there will be a population of thirty thousand, and if Douglas and Naco be included the population will not fall far short of fifty thousand.

And the Warren district is just getting well started in the production of copper. The enormous investments recently made by the owners of the Copper Queen for the purpose of securing fuel and transportation for the Warren district is sufficient evidence that during the lifetime of none of the present population will there be any scarcity of ore in the mines now in operation here.

WHAT AMERICANS
SPEND ABROAD.

In a recent issue of Public Opinion H. C. Nicholas declares that experts on foreign exchange agree that for the last five years an average of more than \$100,000,000 a year has been spent by American tourists abroad. Present indications are that fully 150,000 cabin passengers will cross the Atlantic eastward this year, and the cost of the vacations of these 150,000 tourists will amount to not less than \$150,000,000, or an average of about \$1,000 apiece. Of this \$37,500,000 is passage money paid to steamship lines, an estimated average of \$250 a round trip for each cabin passenger. According to well formed steamship officials this estimate is, if anything, too conservative. According to foreign exchange experts, the average tourist spends abroad three times the cost of his round trip ticket across the Atlantic. This would give an average expenditure abroad per tourist of \$750, which would indicate that the 150,000 tourists who go to Europe this summer will spend a total of \$112,500,000. Add the passenger fares across the Atlantic and a grand total of \$150,000,000 is the result.

NEWSPAPERS REPORTED
THE FACTS.

The attempt of Attorney Richardson to square himself with the Mexican government by accusing the newspapers of exaggerating or misstating the facts concerning Mr. Graham taking an armed posse to Mexico for the purpose of taking forcible possession of the El Tigre mine will not result to the benefit of himself or to his client if the Mexican officials see fit to make an investigation of the facts of the case.

If the Mexican officials will investigate in Douglas they will have no trouble in finding that what the newspapers printed were the actual facts in the case.

Newspapers have enough to contend with in rectifying erroneous statements which reach their columns in the hurry of gathering the news for a daily newspaper and so far as this paper is concerned it will not submit to being made a scapegoat of without speaking out in open meeting. In the Graham-El Tigre matter the facts were printed

\$100 REWARD. \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address:

A GENERAL BANKING BUSINESS TRANSACTED

and without any attempt at sensationalism. That the statements printed concerning Mr. Graham going to Mexico with an armed posse to take charge of the El Tigre mine were absolutely correct is known to the people of Douglas and to the people of Bisbee. If Consul Maza cares to investigate the facts as published in the newspapers in this city he will find that they were given to the public with unusual correctness.

As to who is right or who is wrong in the controversy which has arisen between Mr. Graham and the Kansas City stockholders will, we suppose, be for the courts of Mexico to decide and this paper has no desire to "but in" with advice to any one, but we desire to make it plain to the people of Douglas and the people of Sonora that no misstatement of facts or exaggerations were made concerning the matter under discussion. We hope that Consul Maza and the Mexican authorities will make a thorough investigation and satisfy themselves that Attorney Richardson has done the newspapers an injustice in trying to "back water" at their expense.

With Mr. Graham and the armed posse that went to the El Tigre mine in Sonora was Mr. Loe Gould, of the Bisbee Miner, who may be relied on implicitly for his truth and veracity. His articles written before he started and after he returned from the trip all substantiate the facts in regard to the purpose of the guns and the men and ammunition as published in the Douglas newspapers. Mr. Gould in his article published after his return to Bisbee stated that the El Tigre mine was in possession of Mr. Graham and that the armed men left there were able to stand off a regiment of soldiers and that they were there to prevent the Kansas City people regaining possession of the mine. Newspapers, as well as lawyers on the international boundary line, desire the respect and confidence of the Mexican officials and we hope that a full investigation will be made of the assertion of Attorney Richardson to Consul Maza regarding the "exaggeration" of the newspapers in printing the statements that Mr. Graham had taken an armed posse to Mexico to take possession of the El Tigre mine.

Last Friday at Ash Fork occurred another fire in which a babe's life was lost. Mrs. J. P. Shipp, whose husband is employed on the Peavine at Prescott, went over to town to see about getting transportation for herself to that place. She left her little two and one-half year old child lying asleep in its bed when she went out and in some way which will never be known, the house caught fire and burned completely. Later the charred remains of the little one were found in a room adjoining that

CROUP

Is a violent inflammation of the mucous membrane of the windpipe which sometimes extends to the larynx and bronchial tubes; and is one of the most dangerous diseases of children. It almost always comes on in the night. Give frequent small doses of Ballard's Horehound Syrup and apply Ballard's Snow Liniment externally to the throat.
